This guide is based on a study of referees' reports and letters from journal editors on the reasons why papers written by non-native researchers are rejected due to problems with English usage, style and grammar. It draws on English-related errors from around 5000 papers written by non-native authors, 500 abstracts by PhD students, and over 1000 hours of teaching researchers how to write and present research papers. English for Research: Usage, Style, and Grammar covers those areas of English usage that typically cause researchers difficulty: articles (a/an, the), uncountable nouns, tenses (e.g., simple present, simple past, present perfect), modal verbs, active vs. passive form, relative clauses, infinitive vs. -ing form, the genitive, noun strings, link words (e.g., moreover, in addition), quantifiers (e.g., each vs. every), word order, prepositions,

acronyms, abbreviations, numbers and measurements, punctuation, and spelling. Due to its focus on the specific errors that repeatedly appear in papers written by non-native authors, this manual is an ideal study guide for use in universities and research institutes. A Learner's Guide to Definite and Indefinite Articles Routledge

The leitmotif, but not exclusive theme, of the present volume is Ronald Langacker's (1987) thesis that "lexicon, morphology, and syntax form a continuum of symbolic units serving to structure conceptual content for expressive purposes". The concept of the lexicogrammar continuum contrasts especially with mainstream generative grammar, but also, although less radically, with other cognitive linguistic paradigms, such as Construction Grammar. The contributors to this volume explore the lexicogrammar continuum and other issues of the architecture of

language mostly from a cognitive linguistic perspective. A wide range of theoretical and methodological themes is covered such as the integration of discourse and interactional phenomena into Cognitive Grammar, the status of introspective data, figurative language and thought (i.e. metaphor and metonymy), morphosyntactic constructions, and phonological structure. Besides English (including Old English), languages analyzed in some detail include Polish, Czech, Dutch, Estonian, Georgian, German, Danish, and Portuguese. The volume will be of interest to scholars and graduate students in cognitive linguistics, especially Cognitive Grammar, Construction Grammar, metaphor and metonymy, and corpus linguistics.

This book is based on a study of referees' reports and letters from journal editors on reasons why papers written by non-native researchers are rejected due to problems with English grammar. It draws on English-related errors from around 5000 papers written by non-native authors, several hundred emails, 500 abstracts by PhD

students, and over 1000 hours of teaching researchers how to write and present research papers. The exercises include the following areas: active vs passive, use of we articles (a/an, the, zero) and quantifiers (some, any, few etc) conditionals and modals countable and uncountable nouns genitive infinitive vs -ing form numbers, acronyms, abbreviations relative clauses and which vs that tenses (e.g. simple present, simple past, present perfect) word order Exercise types are repeated for different contexts. For example, the difference between the simple present, present perfect and simple past is tested for use in papers, referees' reports, and emails of various types. Such repetition of similar types of exercises is perfect for revision purposes. English for Academic Research: Grammar Exercises is designed for self-study and there is a key to all exercises. Most exercises require no actual writing but simply choosing between various options, thus facilitating e-reading and rapid progress. The exercises can also be integrated into English for Academic Purposes (EAP) and English for Special Purposes (ESP) courses at universities and research institutes. The book can be used

in conjunction with the other exercise books in the series and is cross-referenced to: English for Research: Usage, Style, and Grammar English for Writing Research Papers English for Academic Correspondence and Socializing Adrian Wallwork is the author of around 30 ELT and EAP textbooks. This book received the XV Research Award of the Spanish Association of Applied Linguistics (XV Premio de Investigación de la Asociación Española de Lingüística Aplicada) 2012. The present volume bears witness to the Europe-wide character of the Content and Language Integrated Learning (CLIL) enterprise by featuring contributions from researchers and teacher-educators from a range of European countries spanning the geographical expanse of the continent from east (Estonia) to west (United Kingdom) and from north (Finland) to south (Spain, Italy). More importantly, the

different national contexts are characterised by diverse cultural stances and policies vis-à-vis second and foreign language learning in general and learning specific languages in particular and it is evident that such contextual factors impinge on what are identified as central concerns both in CLIL implementation and research.

Introducing English Grammar provides a basic grounding in English grammar, without going into too much detail or theory, and will lay the foundation for further grammatical studies. David Young presents English grammar in a coherent and lively way.
